Sioux Steel Company v. KC Engineering, P.C.

Jason O'Mara, PE February 27, 2017

		igineering, 1.c.	Page 25				Page 27
			rage 25				raye 21
1	Α	I can explain why we spot-checked.		1	Q	So KC did not analyze the design drawings of the	
2	Q	We'll get there later.		2		vertical hopper seams, correct?	
3	Α	Okay.		3	Α	Analyze the drawings?	
4	Q	A structural engineering analysis of a hopper design		4		Analyze the design drawings of the vertical hopper	
5		drawing would require an analysis and review of panel		5		seams.	
6		seams.		6	Α	I don't the question doesn't make sense to me.	
7	Α	If I were the only designer, if I were the one who was		7		Well, take a look at Exhibit 24.	
8		responsible myself for the design and I weren't just				Okay.	
9		doing a review of limited scope, then, yes, I would		9		I have the vertical panel seam marked there with	
10		have to check every single connection.		10	V	yellow. Do you see that?	
11	\circ	Is there anything in the structural engineering			Δ	Uh-huh.	
12	Q	analysis of a hopper design drawing that would require				KC did not analyze Exhibit 24, the design drawing of	
13		an analysis and review of the panel seams?		13	Q	the vertical hopper panel seam; is that correct?	
						By not analyzing the drawing, do you mean that we did	I
14		Would it be required unless it's excluded?			А	not do an independent calculation of the capacity of	l .
15	А	And I'm telling you that there's that that question		15			
16		is incomplete. You're trying to say that because I		16	_	that seam?	
17		didn't check that connection, that I didn't fulfill my		17		I mean you didn't analyze it.	
18		duty as an engineer, but that's			Α	Well, we did analyze the stresses along that seam.	
19	Q	Let me ask you this: By not checking that seam, the		19		When we did our RISA model, we created a	
20		vertical panel seams in the hopper do you feel that		20		three-dimensional model that included the hopper, and	
21		by not doing that, you performed professional services		21		it gave us stress the output of that. After we	
22		from a structural analysis point of view?		22		applied our loads to the model, the output of that	
23	Α	Rephrase the question, please.		23		model was loads and stresses and forces that were then	
24		MR. GOODSELL: Do you want to read that back for	ſ	24		given in the report that we gave to Chad.	
25		me, please.		25	Q	But KC did not analyze the design drawings of the	
			Page 26				Page 28
1		(The record was read by the reporter as follows:		1		vertical hopper seams to see if they could withstand	
2		Question: "Let me ask you this: By not checking		2		the forces that would be developed that you calculated	
3		that seam, the vertical panel seams in the hopper do		3		off the RISA model, correct?	
4		you feel that by not doing that, you performed		4	Α	We did not specifically do a hand calculation to check	
5		professional services from a structural analysis		5		the different limit states for those bolted connections	
6		point of view?")		6		at those vertical seams, that's correct.	
7		THE WITNESS: No. When you don't do something.		7	О	KC specifically stated in its proposal that the project	
8		that's not doing something, so no.	,	8		description included a structural engineering analysis	
9	В	Y MR. GOODSELL:		9		and design review, correct?	
10		A structural engineering analysis of a hopper design		10	Α	That's correct.	
11	~	drawing would require analysis and review of the panel		11		KC never modified, altered, or changed its written	
12		seams. True or false?		12	~	proposal dated July 30, 2012, Exhibit 17; is that	
	Д	A complete analysis, yes.		13		correct?	
		An analysis by KC of the drawings of the vertical			Δ	We did not.	
15	×	hopper seam panels would have disclosed an error in the				KC never in writing altered, modified, or changed the	
16		vertical seam design; is that correct?	-	16	Y	scope of the professional engineering services provided	
	Δ	I believe that it would have, yes.		17		in its proposal.	
18		KC did not analyze the design drawings of the vertical		18	٨	That is correct.	
19	Ų	hopper panel seams.		19		KC never in writing notified Sioux Steel that its	
20	Λ	KC did not analyze the design drawings of the vertical		20	Ų	services under the proposal, Exhibit 17, were limited	
21	A			21		because of Sioux Steel's failure to provide	
21	\cap	hopper seams? Is that correct?		22		information; is that correct?	
		We looked at those drawings because we needed the		23	Λ	Our proposal included the requirement that Sioux Steel	\
24	Α	geometry in order to make our RISA model. We did no	t	24		provide us with all criteria and full information as to	7
44		200 Hou v III OTUCI TO HIGKE OUI KISA HIOUCI. WE UIU IIO	L				
25			-				
25		specifically check the capacity of those seams.		25		the requirements of the project, and we also required	

		ignicering, 1 · · ·	Page 29			Page 31
			age 25			1 age of
1		for them to send us their calculations. So I think		1		weightbearing seams.
2		that our scope was limited within our proposal.		2	A	Correct.
3	Q	KC never in writing notified Sioux Steel that its		3	Q	Seams in a hopper are an important structural design
4		services under the proposal were limited because of		4		component.
5		Sioux Steel's failure to provide information. Is that		5	A	Correct.
6		a correct statement?		6	Q	KC contracted with Sioux Steel to do a structural
7	Α	I think implicit in our requirement that they provide		7		engineering analysis and design review of the hoppers.
8		calculations for us to review is that our scope		8	A	Correct.
9		includes them providing calculations for us to review.		9	Q	KC concluded that the design for all the members and
10		What's the answer to my question?		10	`	plates fell within acceptable material limits for each
11		MR. TOBIN: I think he just provided it to you.		11		member except for the columns on the 30 foot hopper.
12		MR. GOODSELL: He did not. Let me repeat the		12	Α	Yes. And there's some clarification necessary with
13		question.		13		that answer, that what we analyzed was the plates and
14		THE WITNESS: Okay.		14		the members because that's what our RISA model checks
15	В	Y MR. GOODSELL:		15		for us kind of automatically. So as I've stated
16	_	KC never in writing notified Sioux Steel that its		16		before, our scope did not include independent hand
17		services under the proposal were limited because of		17		calculations of all the connections which are not part
18		Sioux Steel's failure to provide information.		18		of the RISA model.
19	Α	I think that our proposal limits the scope based on		19	0	
20	- 1	information provided by Sioux Steel.		20	A	
21	0	If your proposal limited the scope, you never notified		21		We may have to go to the full context of that report,
22	~	Sioux Steel that there was a limitation to the scope of		22	~	but there was specific hand calculations in the report
23		your review because they failed to provide information;		23		that dealt with the column seams or the column
24		is that correct?		24		supports, correct?
	Α	We notified them in our proposal that we have excluded		25	Α	That's correct.
	11	we notified them in our proposal that we have exchange			- 1	That's correct.
		ļ	Page 30			Page 32

If one part of a structure fails, then the whole It's either pass or fail, right? Yeah. Correct. And it's either it's all okay or if one part is deficient, then the whole is deficient, correct? That's correct. Now, the exception that the columns were not sufficient
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A Q A Q	anything not specifically stated in this proposal. We did not state anywhere in our proposal that we would do independent hand calculations of every connection. KC never in writing notified Sioux Steel that its services under the proposal were limited because of Sioux Steel's failure to provide information. Is that a correct statement? I think that our proposal was notification to Sioux Steel that our scope was limited. After the proposal was accepted, KC never in writing notified Sioux Steel that its services under the proposal were limited because of Sioux Steel's failure to provide information. I think that's correct. And it's generally understood in the engineering community a structural engineering analysis and design review of hopper drawings should include an engineering analysis of weightbearing seams. Yes. A structural analysis of a hopper design drawing would, by its engineering description, include an analysis of weightbearing seams.		2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A Q A Q A Q A Q	And it was your best engineering opinion at the time you issued your report on August 28, 2012, that the column seams were not sufficient as designed, correct? Not seams, but yes, the Excuse me. The columns. The columns. That's correct. Okay. And the only exception noted as not sufficient as designed were the columns on the 30 foot hopper; is that correct? That is correct. And we talked about this: Not sufficient design is a stamp that the entire structure is defective; is that correct? Yeah. If one part of a structure fails, then the whole It's either pass or fail, right? Yeah. Correct. And it's either it's all okay or if one part is deficient, then the whole is deficient, correct? That's correct. Now, the exception that the columns were not sufficient as designed was later withdrawn or modified, correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A Q A Q A A Q	anything not specifically stated in this proposal. We did not state anywhere in our proposal that we would do independent hand calculations of every connection. KC never in writing notified Sioux Steel that its services under the proposal were limited because of Sioux Steel's failure to provide information. Is that a correct statement? I think that our proposal was notification to Sioux Steel that our scope was limited. After the proposal was accepted, KC never in writing notified Sioux Steel that its services under the proposal were limited because of Sioux Steel's failure to provide information. I think that's correct. And it's generally understood in the engineering community a structural engineering analysis and design review of hopper drawings should include an engineering analysis of weightbearing seams. Yes. A structural analysis of a hopper design drawing would, by its engineering description, include an analysis of weightbearing seams. Could you read that back?		2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A Q A Q A Q A Q A Q	And it was your best engineering opinion at the time you issued your report on August 28, 2012, that the column seams were not sufficient as designed, correct? Not seams, but yes, the Excuse me. The columns. The columns. That's correct. Okay. And the only exception noted as not sufficient as designed were the columns on the 30 foot hopper; is that correct? That is correct. And we talked about this: Not sufficient design is a stamp that the entire structure is defective; is that correct? Yeah. If one part of a structure fails, then the whole It's either pass or fail, right? Yeah. Correct. And it's either it's all okay or if one part is deficient, then the whole is deficient, correct? That's correct. Now, the exception that the columns were not sufficient as designed was later withdrawn or modified, correct? That's correct.

So I felt that we had fulfilled our responsibility based on my understanding because we had provided Chad with what he asked for specifically. MR. GOODSELL: I'm going to move to strike the answer as being nonresponsive.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q A Q Q	Yeah, we said we excluded anything not specifically stated in the proposal. Is there any documentation in your file that your interpretation of the proposal, Exhibit 7 and 17, are consistent with the client's understanding of the limitations you claim exist in 7 and 17? You're asking did I get well, Sioux Steel accepted our proposal. I'm asking two questions: One, is it documented? And did it happen? Okay. Sioux Steel accepted our proposal, so that implies that they read it and accepted it. You want to know if I got some confirmation from him as to what he understood our proposal meant? That's correct, before you issued your report on August 28, 2012. Yeah, that's what I think we talked about and I think Eric talked about with him was kind of the goal of this review. The goal of this review, as I said, was to do an independent determination of the loads and the RISA	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22		for you to issue your opinion letter/engineering document on August 28, 2012, that the designs were sufficient except for the columns on the 30 foot hopper? Yeah, what I decided to do in the absence of Chad's calculations to review was to have Derek spot-check some of the connections. This was above and beyond our scope. Spot-checking connections was not part of our scope. This is something that we did in the absence of calculations from Chad to review. So I asked him to spot check some connections that I felt were unique as far as Sioux Steel's experience. The results of those spot checks gave me a high degree of confidence in Chad's ability because the results showed that those connections were neither significantly overdesigned or significantly underdesigned. So I felt that we had fulfilled our responsibility based on my understanding because we had provided Chad with what he asked for specifically. MR. GOODSELL: I'm going to move to strike the answer as being nonresponsive. MR. TOBIN: I object.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q A Q Q	Yeah, we said we excluded anything not specifically stated in the proposal. 1		responses made to interrogatories by Sioux Steel to KC.	1		something, the public is supposed to be assured that
2		Does that sound correct?	2		it's designed properly.
3		Take a look at it with counsel. I want to make	3		Y MR. GOODSELL:
4		sure that we understand the document.	4	Q	But you can't rely upon his work or his stamp or his
	A	It says, "Defendant's Supplemental Answers and	5		design in giving any opinions as to the sufficiency of
6		Responses to Plaintiff's First Set of Interrogatories	6		the hopper design, correct?
7		and Requests for Information."	7	A	You're trying to make it an all-or-nothing thing, like
8	Q	And if you go to the end of it, I think it's signed by	8		either Chad's entirely responsible or I'm entirely
9		the client, and is that your signature?	9		responsible, and it's Chad has testified that he was
10		Yes, it is.	10		the designer responsible for the design and that he
11	Q	Okay. And I want to discuss with you your answers, and	11		hired us to do a review. Our review, as I've stated,
12		I'm going to do it phrase by phrase starting on page 5.	12		was limited in its scope. It was not to design these
13		Okay.	13		things from scratch. Chad spent months on this. We
14	Q	"Defendant answers that Plaintiff and its in-house	14		spent 40 hours plus
15		engineers and designers were responsible for the	15	Q	3 1 3
16		design."	16		entered into a proposal, there's no documentation that
17		Is that your testimony?	17		you discussed with Chad the limitation of your services
18	A	Wait. Where?	18		in terms of the scope of structural engineering
19		MR. TOBIN: I don't think we're on the same page.	19		analysis on hopper seams; is that correct?
20		MR. GOODSELL: Okay. It should be right about	20	A	I believed at the time that the scope was understood.
21		here. Are you there?	21	Q	The next statement is, "Plaintiff hired Defendant to do
22		MR. TOBIN: It starts right there.	22		a peer review of Plaintiff's design."
23		THE WITNESS: Defendant answers? Oh, yes.	23		Is that your testimony?
24	B	Y MR. GOODSELL:	24	A	Yes.
25	Q	So let me read that. Is that "Defendant answers that	25	Q	Continuing on, "that the review was limited in scope
		Page 58			Page 60
1		Plaintiff and its in-house engineers and designers were	1		and did not include a detailed calculation of every
2		responsible for the design of the hopper."	2		connection." Is that your testimony?
3		Is that your statement?	3	Α	That's my testimony.
4	Α	Yes.	4		Pardon?
5	O	And by responsible, does that mean responsible to get	5	_	Yes.
6		the design drawings to KC?	6	О	And it's your testimony that under the controlling
	Α	No. That means responsible for the design of the	7		scope of your review, there was no duty to review the
8		hopper.	8		assembly of the hopper seams in the panel?
9	Q	11	9	Α	Well, it was in my scope to review Chad's calculations,
10	*	that they were asking you to review, correct?	10	-	yes, it was.
	Α	Yes.	11	0	
12		So Sioux Steel is coming to you with hopper designs	12	~	and drawings, and you were obligated to review the
	*	prepared in-house, and they're asking you to review	13		drawings.
13		1 1 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2			o
13 14		those designs.	14	Α	Calculations are necessary in order to know whether
		those designs. Yes.		A	
14 15	A	Yes.	15		what's shown on the drawing is adequate or not. You
14	A Q	Yes. Correct?	15 16		what's shown on the drawing is adequate or not. You can't review the drawings and know whether they're

1	A	I believe so, yes.	1	Q	at that time, where you now are testifying in your
		I want to go to the second paragraph of your answer,	2		answers to interrogatories that he was knowledgeable
3	_	starting with "to confirm that they were reasonable."	3		and competent
4		Are you with me there?		٨	Yeah.
		Hold on a second.			
5			5	Q	your own report and calculations in your report show
6	Q	Okay.	6		that out of the three hand-checked calculations, one
7		(Pause in the proceedings.)	7		was wrong; is that correct?
8	A	Okay. Yes.	8	A	Yeah, but that's not a failure rate at 33 percent, if
9	Q	And you're saying that, "in order to confirm that they	9		that's what you're thinking. It takes very many
10		were reasonable and that Plaintiff appeared to be	10		calculations to get to a correct answer, and it takes
11		knowledgeable and competent."	11		only one error to get an incorrect answer.
12	Α	Yeah, I thought that in the absence of calculations	12		So Chad was correct about the loading, about the
13		from Chad, it would be prudent for us to do some spot	13		load distribution and how it transferred through the
14		checks of connections. This is something beyond our	14		structure, and then he designed those connections
15		scope.	15		having made correct calculations all the way through.
			16		To arrive at an incorrect answer for the column,
16	Q	And based on those spot checks, it's your conclusion			
17		that he was knowledgeable and competent.	17		it only takes one mistake. So it's not a 33 percent
18	A	Yes. As I said, the results of those spot checks gave	18		error rate, if that's your point.
19		us confidence that Chad was doing things right because	19	Q	Is there any place in the engineering documents where
20		the designs came back as neither way overdesigned or	20		Sioux Steel requested you to review the competency of
21		way underdesigned but looked like somebody intelligent	21		Chad Kramer?
22		had designed them.	22	A	Well, no. I mean, the review of his design is checking
23	Q	There were three spot checks that you performed,	23		to see if his design is correct, but it's not it's
24		correct? One was on the support columns?	24		not necessarily going to tell me if he's competent,
25	Α	Yeah, I believe that's right.	25		you know.
